

Carbon Dioxide Fire Extinguishers

A powerful first line of defense

- Non-corrosive and non-conductive
- Leaves no residue to clean up
- Simple operation and maintenance
- Portable, compact design
- UL/ULC listed
- USCG approved with proper bracket
- Six-year limited warranty

Be prepared to respond quickly and effectively to fires involving flammable liquids and gases (Class B) and energized electrical equipment (Class C) with SENTRY Carbon Dioxide Fire Extinguishers.

Fast Response, No Cleanup

Carbon dioxide extinguishers provide an effective agent to respond quickly to Class B and Class C fires. The gaseous extinguishing agent is non-corrosive, non-conductive and leaves no residue to clean up. These extinguishers may be used indoors where winds and drafts do not affect discharge.

SENTRY carbon dioxide extinguishers are available in one-piece, powder-coated steel or lightweight aluminum shells in capacities of 5 lb (2.27 kg), 10 lb (4.54 kg), 15 lb (6.80 kg) and 20 lb (9.07 kg). The steel shell option features a fluted-base design to resist corrosion and help prolong service life. The extinguishers are easy to operate and maintain while offering a six-year limited warranty from the date of delivery. With the heavy-duty vehicle bracket, the 5, 10 and 15 lb models are USCG approved for marine use. All models are UL listed and all aluminum models are also ULC listed.

APPLICATIONS FOR SENTRY CARBON DIOXIDE FIRE EXTINGUISHERS

Battery rooms

Electrical switchgear rooms

Furnace rooms

Laboratories

Municipal fire departments

Printing presses

Pump rooms

NOTE: As carbon dioxide suppresses fire by diluting oxygen, it is important to confer with an Authorized SENTRY Distributor and reference the SENTRY Manual (Part No. 429425) prior to selecting, operating or servicing a carbon dioxide fire extinguisher.

A Passion for Protection

Dedicated customer support. Extensive product portfolio. Engineering excellence. Trusted, proven brands. Tyco Fire Protection Products offers all of these attributes, plus a passion for protection. It's what drives us to create solutions to help safeguard what matters most — your valued people, property and business.
